

**Assignment – 18**  
**Maintaining the Integrity of your Data.**

- 1) Create a table called Cityorders. This will contain the same onum, amt and snum fields as the Orders table, and the same cnum and city fields as the Customers table, so that each customer's order will be entered into this table along with his or her city. Onum will be the primary key of Cityorders. All of the fields in Cityorders will be constrained to match the Customers and Orders tables. Ensure the parent keys in these tables have the proper constraints.
